

Residue and PK Analytical Services

Comprehensive analytical service for pilot trials through to formal GLP

Accurately measuring low concentrations of residues in complex samples such as blood and tissue can be challenging. Here at Analytica Laboratories, experienced scientists solve your problems using the latest and best equipment in a regulated environment.

We are an IANZ accredited ISO17025 laboratory and GLP facility. We operate under MPI's Recognised Laboratory Programme, and are an approved transitional facility (allowing analysis of samples from offshore). We are an IRD approved R&D provider and hold a controlled drug license allowing us to work on restricted materials from cannabis to methamphetamine.

We have one of the best equipped Mass Spectroscopy labs in the southern hemisphere, routinely applying technologies such as LC-MS/MS, GC-MS and HPLC. Our customers include ACVM consultants, medicinal cannabis companies and nutraceutical companies, veterinary researchers, product development specialists and many more.

Benefits of using Analytica Laboratories are:

- Collaborative approach and clear communication
- Cost effective and flexible
- Renown reputation for assay development
- Extensive experience and expertise with analytical methods
- A dedicated team with experience across a spectrum of industries – animal, dairy, honey, plant and environmental
- Confidence and reliability of laboratory results and data

Some recent work examples:

- GLP bioequivalence
- Nutraceutical ingredient and human trial analysis
- Tissue antibiotic analysis
- Honey alkaloid screening
- Natural product extraction development and testing

Analytica Laboratories takes pride in working with clients. Our friendly and efficient service, with our genuine interest in your needs, makes us a true testing partner.
